(54) Title: METHOD AND DEVICE FOR GRINDING A SAW CHAIN

(57) Abstract: The present invention relates to a method for grinding a saw chain (26), said saw chain (26) being clamped in a position suitable for grinding, that a rotating grinding disc (11) manually is transferred from an inactive position to an active position, and that grinding of a cutter link (39) of the saw chain (26) is effected when the grinding disc (11) has assumed its active position. The invention also relates to a device for grinding a saw chain. It is significant of the invention that the transfer of the grinding disc (11) from inactive position to active position is effected by means of a rectilinear movement that is carried out by rolling contact.
